PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable, production-ready web applications using React, Node.js, and PostgreSQL. Recently completed B.Tech in AI & DS, equipped with strong full-stack skills across the MERN stack. Skilled in integrating AI/ML-powered features, bridging frontend design with backend logic, optimizing database performance, and deploying intelligent applications for real-world problem-solving using JavaScript and Tailwind CSS.

SKILLS

Programming Languages: Java, C, Python

Web Development: HTML, CSS, JavaScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Pandas, NumPy, Nodemailer, Tailwind CSS, Bootstrap

Databases: MongoDB, MySQL, PostgreSQL, Redis

Tools, IDEs & AI/ML: VS Code, PyCharm, Git, GitHub, Postman, Docker, Gemini API, Web Speech API, Vercel, Render, LLM Integration (Basic), RAG – Retrieval-Augmented Generation (Basic), AI Pipelines

EDUCATION

GNIOT Group of Institutions, Greater Noida — 2026

B. Tech in AI & DS | CGPA: 7.74 (Final Semester — Result Awaited)

Radiant Central Academy, Ambedkar Nagar — 2022

Senior Secondary

Ashrafia Convent School, Azamgarh — 2020

Secondary

INTERNSHIP

Agratas Infotech Pvt. Ltd. | Full Stack (MERN) Intern | Noida, UP | Nov 2025 – May 2026

- Built and optimized responsive React.js UI components ensuring seamless UX and high-fidelity client requirement delivery.
- Connected frontend with REST APIs, streamlining data flow between UI and MySQL/PostgreSQL databases.
- Executed comprehensive API testing & documentation, improving codebase reliability and providing clear technical roadmaps.
- Deployed Personal Finance Tracker — implemented JWT Auth, RBAC, Redis caching, and financial analytics dashboard.

PROJECTS

Meeting Room Booking System | Next.js, Node.js, Express.js, MongoDB

- Developed a full-stack meeting room booking platform with real-time room availability and slot-based reservations.
- Designed RESTful APIs for booking management, availability tracking, and cancellation workflows.
- Implemented database-level concurrency control using MongoDB transactions and atomic operations to prevent double-booking.
- Built server-side refund eligibility logic and booking status management based on cancellation timing.
- Ensured data consistency, conflict detection, and seamless synchronization between frontend and backend systems.

Personal Finance Tracker | React + Vite, Node.js, Express.js, PostgreSQL, Redis

- Full-stack finance app featuring JWT Auth & RBAC, Transaction Management, and a Financial Analytics Dashboard.
- Implemented role-based access control ensuring secure, scoped user sessions with protected routes.
- Integrated Redis caching to significantly improve API response speed for frequently accessed financial data.
- Responsive UI built with React + Vite and Tailwind CSS; deployed on Vercel (frontend) + Render (backend).

Recipe Recommendation System | React.js, Bootstrap, Axios, REST APIs

- Built a responsive web app delivering personalized recipe suggestions with dynamic search and category filtering.
- Integrated third-party REST APIs using Axios for real-time recipe data fetching and interactive UI updates.
- Implemented React state management for smooth user interactions, filter persistence, and live result rendering.
- Designed a clean, mobile-friendly interface with Bootstrap ensuring accessibility across devices.

CERTIFICATIONS

- Data Structures and Algorithms using Java — Infosys Springboard, 2025
- Introduction to SQL — Simplilearn SkillUp, 2025
- Full Stack Web Development — E&ICT Academy, IIT Kanpur, 2025
- Student of the Semester — CSDC, GNIOT, 2025
- C & C++ Programming — E&ICT Academy, IIT Kanpur, 2024

EXTRACURRICULAR ACTIVITIES

- Student Coordinator – Sports Event, AI&DS Department
- Represented department in Spardha, fostering teamwork, sportsmanship and collective achievement.
